PROFESSIONAL SUMMARY

Entry-level Software Developer and MCA graduate with strong fundamentals in frontend web development. Comfortable working with HTML, CSS, and JavaScript to build responsive user interfaces and basic web functionality. Gained academic exposure to full-stack concepts including React, Java, Spring Boot, and databases through guided projects and structured learning. Seeking trainee or junior software developer roles to strengthen fundamentals and grow under mentorship.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript

Frameworks: React (basic)

Backend (Academic Exposure): Java, Spring Boot, REST APIs

Database: SQL (basic)

Version Control: Git, GitHub

PROJECTS

Banking Web Application – MCA Academic Project

- Full-stack web application developed to understand frontend–backend interaction, authentication flow, and deployment basics.
- Technologies: HTML, CSS, JavaScript, React (basic), Spring Boot, SQL.
